# Challenge 02 - CSS Intro

For this week's challenge, you will need to create a web page and use all of the properties from the previous lectures for positioning the elements. Use the screenshots to see how the page should look like.

Additionally, in the screenshots folder, you have a video where is shown on the whole website. Use the colors.txt file for matching the exact styles.

Evaluation system:

1 point - Complete the whole page using HTML & CSS;

3 points - Set the images' behavior like on the video (use parallax effect);

5 points - Darken the images, change the cursor to a hand while pointing to action items; Set the borders next to the images with the specified colors, and position all of the elements with the CSS property "position" only.

Deadline:

One week after its presentation, 23:59h end of the day.
